

Monthly NewsShot
January 17

Security

We want you to know what is happening on your development. We will be issuing a monthly update about a different topic. This month the chosen topic is Security on site. We would like to take the opportunity to inform residents what facilities we have in place and what the arrangements are.

The development has **91 CCTV** cameras in various locations. We are always looking at increasing the number of cameras we have and from April 2017 the number of cameras should pass the 100 mark.

Also In place on your Development is **Luis the Security Guard**. Luis patrols the development on Monday, Thursday, Friday, Saturday & Sunday between the hours of **4pm – 1am**. Luis will check to see that the main entrance doors are secure, liaising with the police, looking out for suspicious behaviour, people loitering and escorting them off the development.

We have now equipped Luis with a **body camera** to capture footage whilst he patrols the development.

We have been working with the local police and are currently in the process of setting up a Neighbourhood Watch on a block by block basis, more details can be found on the development website www.colindalepulse.com which includes the date of your meeting.
